PROTECTION OF MATERNAL HEALTH AND PROMOTION OF MOTHER-CHILD ATTACHMENT IN THE PERINATAL PERIOD

The Department of Psychology at the University of Turin is conducting a research project titled “Protection of Maternal Health and Promotion of Mother-Child Attachment in the Perinatal Period,” to better understand the individual and relational dynamics that come into play in the perinatal period in contexts of conflict and vulnerability.

The research involves the completion of anonymous online questionnaires.

If you wish to participate in the research, please click on the following link or scan the QR Code:
